Dear Hiring Manager,

I am writing to wholeheartedly recommend Brian Poole as a front-end web developer for any team or project. Brian was an invaluable member of our team for over a year, during which he played a crucial role in the successful rebuild of our new website and took on additional front-end development tasks that were instrumental in clearing our project queue.

Brian possesses exceptional skills in HTML, CSS, and JavaScript, and his ability to work swiftly was truly impressive. His contributions were particularly crucial in the major parts of our new website, where he demonstrated his proficiency by building out front-end templates at a remarkable pace. These templates formed the foundation for the creation of hundreds of pages on our website.

One of Brian's standout qualities is his positive attitude towards teamwork. Despite not being directly managed by me, I observed how he actively engaged with the team, providing valuable insights and ideas. Brian was always receptive to constructive criticism from senior developers and management, showcasing his commitment to continuous improvement.

An exemplary instance of Brian's dedication occurred during the final stages of the project. After completing a page template, Brian graciously accepted numerous changes and updates requested by the team. Instead of viewing these challenges negatively, he approached them with enthusiasm, promptly implementing the required adjustments. This flexibility and positive attitude were crucial in meeting last-minute changes and updates just before the website launch.

In summary, I wholeheartedly recommend Brian Poole for any team seeking a highly skilled front-end developer who can quickly and efficiently contribute to projects. His ability to hit the ground running, coupled with his positive attitude and collaborative spirit, make him an asset to any development team.

Should you have any further questions or require additional information, please do not hesitate to contact me at dustin.porchia@nasm.org or 602-373-2222.

Sincerely,

Dustin Porchia
Senior Front-End Developer
