- Microsoft Teams

PROFILE

I am a self-motivated Front End Engineer with 8+ years of industry experience. I have a proven ability to write clean, responsive code while making processes and workflows more efficient. I am committed to meeting and exceeding company objectives, and enjoy expanding my skillset by working with new technologies.

EXPERIENCE

React Developer

KLLM Transport Services (Contract) / Remote / Jan 2025 - Present

- Drove the modernization of legacy AS/400 green-screen interfaces by designing and developing responsive front-end interfaces using React and Material UI, significantly improving user experience for a national trucking company.
- Built a comprehensive internal dashboard with secure authentication, dynamic menu generation, and robust admin functionalities, serving as the central hub for reimagined interfaces and new applications.
- Supported business operations by generating monthly reports and developing custom, one-off forms as needed.

Senior Software Developer

GuideStone Financial Resources (Contract) / Dallas, TX / Apr 2024 - Dec 2024

- Modernized customer portal by converting legacy codebase to MVC architecture and implementing Figma designs with HTML, SCSS, JavaScript, and jQuery, enhancing scalability and user experience within an agile scrum team.
- Co-developed a standardized UI component library and delivered sprint progress updates to stakeholders, ensuring consistency and alignment with business goals.

Front End Engineer

National Academy of Sports Medicine (Contract) / Remote / Jan 2023 - Jan 2024

- Led website redesign and content updates using ReactJS, JavaScript, jQuery, CSS, and HTML, delivering innovative features and meeting strict deadlines through collaboration with design and content teams.
- Researched and implemented high-performance front-end solutions, boosting user engagement and functionality.

Front End Web Developer

Zywave / Remote / May 2020 - Dec 2022

- Developed and maintained content for 2,000+ client websites and launched a WordPress-based platform with custom themes, ensuring timely delivery through cross-functional collaboration.
- Enhanced proprietary CMS with reusable features using clean HTML, CSS, JavaScript, and jQuery, while authoring workflow documentation to improve team efficiency.

Web Production Specialist

Pier 1 Imports (Contract) / Fort Worth, TX / Oct 2019 - Mar 2020

Web Developer

Brown & Brown Insurance / Dallas, TX / Mar 2018 - Sep 2019

Daniel Miller
Senior Software Developer

To Whom It May Concern,

I am writing to personally recommend Brian for consideration as a web developer. I have enjoyed working alongside Brian as his senior developer for nearly a year as a contractor on several large user-facing projects.

As a software developer, Brian has shown strong initiative, great teamwork, and attention to detail. One example of his impact was when he went above and beyond in our final project, knocking out bugs and tasks left and right nearly as soon as they were reported. The whole team noticed and commended him for his hard work.

Brian learns quickly and isn't afraid to jump into code that's beyond his current knowledge. Beyond his professional skills, Brian is friendly, dependable, and trustworthy.

I have no doubt that Brian will excel in any position. I wholeheartedly recommend him and am confident he will make a significant contribution wherever he goes.

Please feel free to contact me at daniel.miller@guidestone.org or 214-931-7558 if you have any questions or require further information. I would be happy to discuss Brian's qualifications in more detail.

Sincerely,

Daniel Miller
Senior Software Developer

Steele Ferguson

Senior Enterprise Program Manager

December 2024

To Whom It May Concern:

I am pleased to recommend Brian Poole as a highly skilled and reliable software developer. Throughout 2024, I worked extensively with Brian on several key projects, including establishing a UI design standards library and modernizing our customer portal to mobile responsive design. His contributions were instrumental to our success.

Brian consistently demonstrated technical excellence, problem-solving abilities, and a strong work ethic. His expertise in designing and implementing user-friendly software solutions, combined with his proactive approach to improvement, made him a valuable asset to our team.

Moreover, Brian is a collaborative team player who communicates effectively and fosters a supportive work environment. He has a natural ability to mentor others while maintaining focus on project goals.

I have no doubt that Brian will excel in any role he takes on. Please feel free to contact me if you have any questions about my experience working with him.

Sincerely,

Steele Ferguson

I am writing to highly recommend Brian Poole as a software developer with a strong leaning towards front-end development. During his time at our organization, Brian consistently demonstrated exceptional skills and professionalism in his role as a software developer contracted from BravoTech.

Brian joined our team in April 2024 and quickly became an invaluable asset. He exhibited a strong work ethic, a strong willingness to learn, and a keen attention to detail. Brian was hired as a front-end UI developer, but quickly delved into middle-tier development as the necessity arose. He picked up concepts quickly, such as incorporating automated unit testing into his development practices.

Brian's most notable qualities are his excellent teamwork and communication skills. His positive attitude and willingness to go the extra mile made him a pleasure to work with. Brian always met his deadlines, even under pressure.

I am confident that Brian will bring the same level of dedication and expertise to his future projects, and I believe he will be a valuable addition to any team.

Please feel free to contact me at 817-505-8782 or gburns8@gmail.com if you require any further information.

Sincerely,

Gavin Burns
Senior Software Development Manager

December 18, 2024

To Whom It May Concern,

I am pleased to write this letter of recommendation for Brian Poole, who worked as a front-end software developer on my Scrum team from April through December of 2024 while he was contracting via BravoTech. During this time, Brian has proven to be an exceptional team member and an asset to our projects.

Some of Brian's most impressive qualities are his proactive nature and eagerness to learn. He consistently demonstrated a willingness to go beyond front-end, taking the initiative to explore technologies and integrations in our environment. Whether it was getting up to speed with new frameworks or processes or understanding the intricacies of our system architecture, he approached each task with enthusiasm and determination, quickly mastering the skills required.

Brian blended seamlessly into our Scrum team, displaying not only technical proficiency but also a strong collaborative spirit. His ability to contribute effectively to group discussions, assist his peers, and tackle complex challenges made him an invaluable team member. He was always approachable and ready to lend a hand, and his positive attitude made him a pleasure to work with.

In addition to his technical skills and teamwork, Brian proved to be a highly reliable individual, consistently meeting deadlines and maintaining the highest quality of work. His attention to detail and dedication to delivering robust, user-friendly interfaces were pivotal to the success of multiple projects.

I have no hesitation in recommending Brian for any front-end development position. His technical expertise, drive to learn, and ability to work well with others make him an excellent choice for any team. I am confident he will continue to exceed expectations and contribute to the success of any future teams of which he is a part.

If you have any questions, please feel free to contact me.

Sincerely,

Tommy MacKay

December 6, 2024

Brian is a very talented and efficient software engineer. Over the course of time that we worked together I was impressed to see how quickly he was able to bring himself up to speed with new projects. He was eager to take on assignments, especially ones where he could learn something new.

He has been very easy to work with and was able to get along with everyone on the team. I personally felt a sense of comfort when he would take on a project, because I just knew that he would be contributing to the load the team was carrying, and get the job done quickly.

I would highly recommend him for any software engineering needs you have.
